

# MultiTool

## Aluminum Dent Repair Station

*A complete workstation, with the required tools for any aluminum auto body repairs. Specially designed for the repair of aluminum sheet metal panels.*

EL930001

***An easy to handle, mobile workstation cabinet for dedicated aluminum repair tool storage and work bench area.***

More car manufacturers are using aluminum as a lightweight, strong material in constructing vehicles. Aluminum has different properties than steel, requiring special tools, equipment, and processes in its repair.

### WORKSTATION SPECIFICATIONS

Single phase input	115V 50/60Hz
Supply fuse rating (slow blow)	15 A
Weight	270 lbs
Dimensions inches	39.4 x 20.5 x 61.4h

### Features

- **Includes MultiSpot M22 AL**  
115V aluminum capacitor discharge stud welder, complete with stud gun and 2-clamp grounding cables.
- **Anodized aluminum pulling bar kit (90 cm)** with mobile feet and 10x10 cm pivoting bases. The special shape of the feet, with suction cups, will perfectly fit to the car body, including angular surfaces. The kit includes 3 tie-rods and multi-hook gripping heads for a combined or independent dent pulling operation.
- **Anodized aluminum pulling system** for smaller jobs and a single tie-rod with special heads that can pull either a single or a group of hooks. A circular base accessory for the pulling system (to replace the two feet) is used in the repair of small diameter dents.
- **Hammer kit with 4 anodized aluminum hammers:**  
Round head - 3.2 oz.  
Round head - 6.7 oz.  
Square head - 6.7 oz.  
Mallet - 20.8 oz."
- **Heat gun** is provided to heat the dented area of the aluminum panel that needs to be repaired.
- **Touchless, infrared laser thermometer** is provided to closely monitor the heated area to be sure the heat-zone stays within the recommended temperature range.
- **Heat shield gel** is used to create a barrier to protect the parts of the panel that are not to be heated during the aluminum repair process.
- **An angled air die grinder** is provided as a dedicated tool to eliminate cross contamination during the aluminum repair. Used to remove the weld studs and/or for other sanding or grinding operations.
- **A starter kit** of aluminum studs, zinc-plated steel eye-bolts with a plastic holding case is provided.
